EDUCATION

Tezpur University <i>Integrated MSc. in Mathematics</i> <i>CGPA/SGPA: 7.11/10.00 (1st Year)</i>	2025 – Present Tezpur, India
Higher Secondary (AISSCE) <i>Passed AISSCE with 90.0%, Central Board of Secondary Education</i> <i>Shrimanta Shankar Academy, Dispur, Guwahati</i>	2025
Matriculation (AISSE) <i>Passed AISSE with 89.0%, Central Board of Secondary Education</i> <i>Shrimanta Shankar Academy, Dispur, Guwahati</i>	2023

EXPERIENCE

Indian Institute of Technology, Patna <i>Initiation into Mathematics, 2026</i> <i>Mathematics Training & Talent Search</i>	Sep 2026 – Sep 2026 Bihta, Bihar, India
---	--

- Selected to participate among 60 undergraduates from across the country in the Initiation into Mathematics 2026 program by Mathematics Talent & Talent Search, hosted at IIT Patna.
- Attended one intensive week of training in undergraduate mathematics and mathematical thinking. Courses of Real Analysis, Linear Algebra and Foundations.

MAJOR PROJECTS

OrbitForge: Celestial Mechanics Space-Flight Simulator

- Developed a high-accuracy orbital simulator in C++ and Python to solve Lambert's Boundary Value Problem.
- Implemented Encke's perturbations and higher-order symplectic integration to precisely calculate satellite and rocket launch windows to carry out interplanetary missions.

Numerical IVP Solvers & ODE Analysis Tools

- Built custom Python/Matplotlib engines to estimate Initial Value Problems (IVPs) and visualize direction fields for autonomous ODEs.
- Authored an independent (unpublished) paper analyzing Forward Euler, Picard's, Taylor series among other approximation methods for IVPs and Autonomous systems.

3D Surface Normal & Gradient Visualization Engine

- Computed partial derivatives and mapped gradient vector fields for explicitly defined 3D surfaces.
- Built a custom, multi-core frame-by-frame animation engine using Python, SciPy, NumPy, and OpenCV.

3D Mobile Skill Development Van Design

- Engineered a 3D mobile career development van.
- Included interior modeling and demo animations, of a modified vehicle chassis for a commercial agency.

GUI-based Educational Institute Management System

- Solo-developed a GUI-based educational institute management system with Python & MySQL integration, as my AISSCE 2025 Computer Science Project.
- Implemented Tkinter to provide a smooth interface with instant registration and batch system.

SKILLS

Languages : C++, C#, Python, LaTeX, HTML/CSS, SQL (MySQL)

Scientific Modules/Tools : SciPy, NumPy, SymPy, Matplotlib, OpenCV, Jamovi, Spyder IDE (Anaconda Distribution), Jupyter Notebook

Creative/Other Tools : Unity 3D, Blender, GitHub, DaVinci Resolve, OBS, Photoshop, Microsoft 365 Suite

COURSES/CERTIFICATES

Linear Algebra: A Gateway to AI&ML : Mathematics Training & Talent Search (MTTS) Trust

Introduction to Python for Scientific Computing : University of Colorado Boulder (via Coursera)

3rd AGN School on Computational Astrophysics : Indian Space Research Organisation (ISRO) registered tutor
